

ACCESS OPPORTUNITY QUALITY

New Mexico Virtual Course Consortium (NMVC²) is a growing state-led provider network of public districts and charters who serve as supplemental course providers to students across the state through a memorandum of understanding (MOU) with the student's district or charter of residence.

LEARNING OPPORTUNITIES

We can provide up to four virtual courses per student as a supplement to their learning. These courses can be in addition to their program of study or as a virtual substitute for specific courses that LEA's may not have the ability or faculty to teach. For more information on guidelines, how to sign up, or pricing visit our website:
