Health Screening Tool for Families

## Health Screening Tool for Families

***Parents and guardians, use this checklist daily before sending your child to school.***

***If you answer “YES” to one of more questions, you must keep your child home from school today.***

Does your child have any unusual symptoms from the list below?		
	YES	NO
A fever? (Temperature greater than 100°F)		
A new or worsening cough?		
Shortness of breath or difficulty breathing?		
Runny Nose and/or congestion?		
Body aches and/or fatigue		
Vomiting and/or diarrhea?		
New Loss of Taste or Smell?		

If the answer is “yes” to the following questions, you and your child must stay home to quarantine for 14 days since last contact		
	YES	NO
Have you been diagnosed with COVID-19 by a doctor within the last 14 days?		
Have you been asked to self-quarantine because of COVID-19 and are you still within the quarantine period?		
Have you had close contact with or cared for someone diagnosed with COVID-19 within the last 14 days?		

**If the answer to any of the questions above is “yes”, keep your child home** and consult your primary care physician. If a doctor determines that the symptoms are due to another diagnosis, or COVID-19 is ruled out, your child may return to school after being fever free for the 24 hours **without** the use of fever reducing medication.
